

ALFREDO BARRERO

Global Program Lead | Engineering Leadership | GenAI Enterprise Productivity

Phone: +34 690 825 246 | Email: abarrerolabajos@gmail.com | LinkedIn: [linkedin.com/in/a-barrero/](https://www.linkedin.com/in/a-barrero/)

PROFESSIONAL SUMMARY

Strategic Engineering, Product & Operations Leader with extensive experience driving global, large-scale technology initiatives, distributed systems architectures, **post-M&A** integrations, and **AI/ML**-enabled productivity solutions at **Netflix** and the **IOC**. Expert in leading cross-functional teams to optimize complex technical operations and unify disparate systems through data-driven insights. Specialized in bridging the gap between user interaction data and actionable engineering roadmaps to maximize workforce efficiency and operational excellence. Currently leveraging an MBA and PMP background to design Agile scalability frameworks that align technical execution with long-term business strategy.

PROFESSIONAL EXPERIENCE

NETFLIX | Madrid, Spain

Global Program Lead | 2020 – Present

- **Global Engineering Leadership:** Led global engineering, operational teams and cross-functional stakeholders to deliver high-impact productivity solutions, fostering a high-performance culture across diverse regions.
- **Executive Partnership:** Act as a key partner to Directors and VPs, aligning technical execution with business goals and influencing product roadmaps through data-backed insights.
- **AI-Driven Productivity:** Led a team of five people to create GenAI-powered automation for insights generation, reducing manual work by 850+ hours per quarter (\$500k annual value) and converting user interaction patterns into actionable engineering roadmaps that democratized data and improved workforce productivity.
- **Post-M&A Integration:** Led the end-to-end technical integration of 4+ acquired entities, leading global engineering teams to unify disparate tech stacks while directly managing the human-centric fear of change, ensuring the seamless transitions of global standards with zero downtime.
- **Scalability & Global Excellence:** Built standardized technical frameworks to unify globally distributed engineering teams, ensuring cross-vertical alignment while significantly amplifying (+10k hours saved to the business) operational efficiency and enterprise-wide impact.
- **OKR Leadership:** Led the definition of OKRs with global leadership, leveraging Agile frameworks to align priorities for a global distributed operational team (ICs, managers and directors) across all regions.
- **Data Governance & Measurement:** Restructured data taxonomy and implemented a robust governance model, establishing a crucial measurement capability for the first time. This enabled SLTs implementation tracking and facilitated quarterly service reviews for global distributed onsite and remote teams.

- **Cross-Functional Process Improvement:** Designed and standardized escalation frameworks for global distributed operational and engineering teams. These processes included built-in audit trails, ensuring structured handoffs, enabling SLT measurement, and improving accountability across all operational units.

IOC - OLYMPIC CHANNEL | Madrid, Spain

Systems Engineer | 2016 - 2020

- **Mission-Critical Infrastructure Design:** Engineered and deployed large-scale, resilient technical systems for high-profile global events (Olympic Games, Gran Slams,), ensuring 99.9% uptime and seamless delivery under rigorous deadlines and extreme operational complexity.
- **Technical Operations Leadership:** Coordinated global technical teams to optimize infrastructure and support for live international broadcasts and major sports tournaments, managing high-stakes environments where zero-failure was the baseline.
- **Systems Innovation:** Developed and executed innovative technical solutions to resolve high-impact challenges, demonstrating advanced engineering foresight and the ability to scale infrastructure for millions of concurrent global viewers.

KEY SKILLS

- **Leadership & Strategy:** Agile/Scrum Leadership, Global Engineering Leadership, Program Management, Post-M&A Technical Integration, Stakeholder Management, Change Management (Psychological/Technical).
- **Operations & Scale:** Process Optimization & Re-engineering, Scalability Frameworks, Mission-Critical Infrastructure (99.9% Uptime), Cross-Vertical Alignment.
- **Tech & Data Intelligence:** AI/ML Strategy, AI Agentic Copilot Integration, SQL & Tableau Advanced Analytics, Data-Driven Product Roadmaps.

EDUCATION & CERTIFICATIONS

- **Master of Business Administration (MBA)** | ThePowerMBA, 2026
- **Project Management Professional (PMP)** | Project Management Institute, 2023
- **B.S. in Telecommunications Engineering** (Audiovisual & Multimedia) | 2015
